Nikon's D7000 DSLR Camera Kit with NIKKOR 18-105mm DX VR Lens

This kit sets you up from the get-go with Nikon's NIKKOR AF-S DX 18-105mm f/3.5-5.6G ED VR lens. With a zoom range of 18-105mm you'll be prepared for most shooting situations. Whether it's a tight space you find yourself in or there's a somewhat distant subject that you want to capture, the 18-105mm lens provides you with the flexibility to do so. Other highlights of this 18-105mm lens include the AF-S Silent Wave Motor for fast, quiet, autofocus performance and the VR Image Stabilizer for handheld shots at speeds up to three stops slower than would normally be possible.
